Prerequisites

git clone https://github.com/appuio/operator-sdk-examples

Other Prerequisites

- dep version v0.5.0+.
- git
  go version v1.10+. - https://nats.io/documentation/tutorials/go-install/
- docker version 17.03+.
- kubectl version v1.11.0+.-

  - and Install also, to have a quick try of it, Minishift: https://github.com/minishift/minishift
    - in Mac: $ brew cask install --force minishift

  - **Set $GOPATH**

    MAC:

    # Edit ~/.bash_profile

                                export GOPATH=/Users/username/go
                                export PATH=$GOPATH/bin:$PATH

                                # Reload profile : source ~/.bash_profile
    Linux/Windows:
        https://github.com/golang/go/wiki/SettingGOPATH
